## LEGIONELLA BYLAW MANAGEMENT SERVICES

Bylaw Compliance

### LEGIONELLA MANAGEMENT SOLUTIONS

Effective January 1, 2021, all cooling towers and evaporative condensers in the City of Vancouver require;

- An operating permit
- A maintenance logbook on-site per system
- Annual offline cleaning and disinfection
- *Legionella* culture test at system start-up
- Action plan when *Legionella* bacteria result is >10 CFU/ml

Additionally, effective January 1, 2022;

- *Legionella* tests now required monthly
- EOCP “Building Water System Operator” certification associated with each system operating permit

The **Pace Legionella Management Team** offers three (3) different levels of management services to help you comply with these city bylaw requirements.

1

#### **Legionella Sampling & Testing**

Pace *Legionella* management team will conduct monthly sampling of the cooling tower system and laboratory submission for *Legionella* culture testing.

2

#### **Pace EOCP Certification**

In addition to option 1, Pace can apply their EOCP “Building Water System Operator” certification to your operating permit as part of an ongoing maintenance plan.

3

#### **Pace Manages Your Permit**

In addition to option 2, the Pace *Legionella* Team manages your system operating permit, renewals, log books, testing and uploading of all required reports.
