

# Horti-Klor™

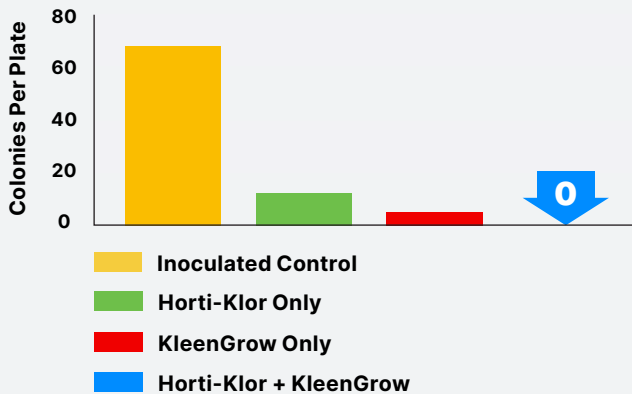

## Heavy-Duty Chlorinated Detergent/Cleaner

Horti-Klor has been formulated for cleaning and sanitizing throughout the food plant and grower industries. Horti-Klor is an active, high-foaming chlorinated detergent designed to help meet the highest food plant and greenhouse grower cleaning standards.

### Effective For Removal Of Stubborn Residue

Horti-Klor is a composite of detergents and emulsifiers formulated to dislodge stubborn materials such as build-up, oily biological residues and dirt. The emulsion will not break during rinsing, thus preventing oily biological residues which contribute to bacterial growth and off-odors.

### Control Of Thielaviopsis Basicola On a Wood Surface With Horti-Klor & KleenGrow

### Chlorinated Formula

Horti-Klor contributes 450 ppm of active chlorine when used at a rate of 20 ml per litre of water.

### High Foaming Action

Horti-Klor produces a high foam when used in a foam applicator. Foam can be beneficial due to the residual soaking action on both vertical and horizontal surfaces. This soaking action contributes to thorough cleaning results.

### Safe & Effective

When used as directed, Horti-Klor is safe to use on stainless steel, aluminum, iron, concrete, poly and glass.

### Areas Of Use

Greenhouses and Indoor growing areas, tools, equipment, storage sheds, packing lines, coolers, trucks, pots, plug trays, ground cover, shade cloth, disposal areas, lunchrooms, washrooms, totes, and other equipment.
