

Chemprocide™ Horti-Klor™ Strip-It®

Chemprocide, Horti-Klor, and Strip-It will clean and disinfect greenhouses, indoor growing structures and irrigation lines, killing algae and diseases in addition to dissolving minerals and biofilm, thus eliminating an environment for over-wintering pest such as snails, nematodes, fungus gnats, insects and diseases.

Greenhouse and Spray Equipment

Step 1

Apply Strip-It to a pre-wet surface using 20 ml/L, using a hydraulic sprayer or foamer. Soak all the interior/exterior surfaces (glass, poly film, corrugated plastic, aluminum, steel, wood, concrete, ground cover/shade cloth, and gravel or dirt floors). Strip-It is phytotoxic to plants (weeds or crops) so protect any desired plants from direct contact.)

Step 2

Allow Strip-It to penetrate dirt deposits 5-30 minutes on hard surface (longer soak time for gravel and ground cover cloth or heavily soiled areas). Rinse thoroughly using a pressure-washer or hose sprayer for hard surfaces. Use gentle rinse with watering hose sprayer for ground cover cloth or gravel.

Step 3

Spray 4ml/L of Chemprocide to disinfect pre-cleaned surface and do not rinse. This will provide 300ppm. Use 1200ppm for virus control.

Cleaning Sprayer: Using Strip-It in your sprayer will also remove chemical build-up from sprayer tank, nozzles and hose. Rinse thoroughly so that pH of rinse water returns to the neutral pH (use standard pH Hydrion paper to test).

Indoor Growing Area

Step 1

Spray HORTI-KLOR at a rate of 40ml/L, using a sprayer or foamer. Apply to walls, floors and benches and allow to SOAK for 5-10 minutes. Wipe off excess solution with clean rag.

Step 2

Rinse off Horti-Klor using a water hose or small sprayer and wipe or squeegee dry.

Step 3

Spray 4ml/L Chemprocide at all pre-cleaned surfaces. DO NOT RINSE. Allow to air dry or use a clean rag, wipe off excess after 5-10 minutes of contact time.

Cleaning Breakroom & Bathrooms

Clean break areas and bathrooms using **Steps 1-2** from the procedure on the left, but pour diluted Horti-Klor into mop bucket and mop onto floor. Rinse floors with water.
