

# Strip-It®

## Heavy-Duty Acid-Based Detergent/Cleaner

Strip-It is a powerful combination of cleaning and wetting agents that effectively remove whitewash coatings, algae, dirt, and mineral deposits including calcium due to hard water issues. Safely removes all common soils found in and around greenhouses, grower structures during crop rotation.

Unlike other cleaning products, Strip-It will not harm the greenhouse structure.

Strip-It removes all common soils found in and around greenhouse structures during crop rotation. Great for cleaning spray equipment and injectors to maintain accuracy and longevity.

### Strip-It Foaming Action

Strip-It's foaming action intensifies the scrubbing action and helps dislodge compacted soils for easy removal with a high-pressure rinse.

- + Dissolves mineral build-up and reduces to a foam for easy removal – no clogging chunks!
- + Penetrates soiled surface so debris is effectively and easily removed
- + Attacks organic build up at a pH of 2.5

### SOP For Eliminating Over-Wintering Pests

- + Detergent clean – Strip-It
- + Rinse – remove debris and dirt
- + Disinfect

### Safe & Effective

When used as directed, Strip-It is safe to use on glass, plastic, poly, aluminum, corrugated plastic, wood, concrete shade, groundcover clothe, and in cool pads and irrigation lines. ALWAYS rinse the cleaned surfaces before the product dries for optimum performance.

### Cool Pad Cleaning

Before

After

Deep cleaning all surfaces and irrigation lines during crop rotation

### Efficacy Of KleenGrow & Strip-It Against PepMV at 22°C On Different Substrates
